- 15.00 BGN per person for up to 45 min. staying.**

HALO THERAPY AS A METHOD FOR TREATMENT IS WIDELY USED FOR THE FOLLOWING ILLNESS:

- * Respiratory diseases - asthma, chronic bronchitis, recurrent pneumonia.
- * Allergic diseases of the nose and throat, hay fever, pharyngitis, sinusitis, rhinitis.
- * Diseases of the cardiovascular system - coronary heart disease, angina, hypertension, hypotension.
- * Neurosis and depression relieve emotional stress, anxiety and nervous tension.
- * Skin diseases (atopic dermatitis, allergic dermatitis, eczema, psoriasis, acne, cellulite, etc.).
- * Postoperative rehabilitation of the respiratory system.
- * Treatment of bacterial or fungal infections of the respiratory system.

The benefits of Halotherapy (salt therapy) is in its greater effectiveness. In 80-90% of people are seen improvements of their condition. Moreover, Halotherapy is suitable for children and pregnant women. No side effects.

Halotherapy is successfully combined with other methods of nonpharmacological treatments such as aromatherapy, various types of massages, kinesotherapy and others.

Halotherapy can be used as a method for the prophylaxis and prevention of chronic nonspecific pulmonary diseases, respiratory allergies, malignancies of the lung, etc. It has proven immune stimulating effect.
